

The Core Formula

$$V = w_L \times L + w_B \times B - w_C \times C$$

This is the **kinetic dominance score** or **net systemic winning power** of any action, word, narrative, policy, move, or event — evaluated from the perspective of a given human system (individual, group, institution, culture, etc.) at a specific moment.

Key Elements Explained

Symbo l	Meaning	What it Represents in Human Systems	Typical Real-World Flavor / Examples	Sign / Directionality
L	Legitimacy / Life / Agency / "right to act"	Permission / moral standing / social acceptance / sovereignty in the eyes of others	Consent, Mandate, Sovereignty, Equity vs Audit, Sanction, Liability	+ = legitimate / allowed / sovereign - = illegitimate / challenged / usurped
B	Benefit / Directional Gain / Upside captured	Actual good stuff obtained (power, money, freedom, status, pleasure, security, resources)	Leverage, Liquidity, Indemnity, Exempt vs Insolvent, Default	+ = gain / win / profit - = loss / deprivation
C	Cost / Resource Expenditure / Systemic Drag / Price Paid	What is burned / sacrificed / externalized (time, money, lives, trust, future options, enforcement)	Liability, Audit, Sanction, Protocol vs Exempt, Indemnity	+ = high cost / drag / burden - = cost avoided / offloaded
w_L	Weight on Legitimacy	How much the system currently prioritizes / cares about being seen as legitimate	High in ideological / religious / institutional systems	Emergent from collective hardening
w_B	Weight on Benefit	How much raw gain / incentive pull matters to the system	High in opportunistic / market / survival-driven contexts	Emergent from collective hardening

w_C	Weight on Cost	How heavily the system feels / accounts for downside / price (often lowest for powerful actors)	High in risk-averse / traumatized / powerless systems Low in elite / extractive systems	Emergent from collective hardening
V	Net Kinetic Value / Dominance Score	How much this move / word / action "wins" or dominates within that system's current weighting	Higher V → more stable / propagating / spreading in the system	Positive = expansive / winning Negative = losing / eroding

Crucial Insight on Weights (the Breakthrough)

w_L, w_B, w_C are not chosen arbitrarily by one person or designer.

They are the **hardened, collective output** of thousands/millions of overlapping human systems interacting over time:

- Teaching, media, laws, arguments, wins & losses, economic pressures, social punishments/rewards, historical events, memes, propaganda, peer pressure, court rulings, market signals, family dynamics, online echo chambers, etc.
- Every collision (word vs word, action vs action, narrative vs narrative) challenges and subtly adjusts them.
- The surviving / dominant weight distribution is what the superorganism has converged toward through real, brutal trial-and-error.

→ The formula doesn't invent human values or priorities —

It mathematically reveals the latent scoring function that human systems have already built and continuously update through their collective behavior.

Quick Reference: Word Engine Examples (expanded dictionary)

Word	Vector (L, B, C)	Typical V (default weights 1,1,1)	Signature	Intuitive System Meaning
Sovereignty	(1.0, 1.0, -1.0)	+3.0	(+ + -)	Strong win — legitimate gain with low personal cost
Exempt	(1.0, 1.0, -2.0)	+4.0	(+ + -)	Ultimate privilege — full upside, costs fully offloaded

Liability	(-1.0, -1.0, 1.0)	-3.0	(- - +)	Heavy drag — loss of standing + gain + high cost
Audit	(-1.0, 0.0, 1.0)	-2.0	(- 0 +)	Legitimacy attack with enforcement cost
Consent	(1.0, 1.0, 0.0)	+2.0	(+ + 0)	Clean mutual win — no net cost drag
Mandate	(1.0, 0.0, 1.0)	+1.0	(+ 0 +)	Duty/obligation — legitimacy boost but costly to enforce
Sanction	(-2.0, -1.0, 1.0)	-4.0	(- - +)	Severe punishment — crushes legitimacy & benefit while imposing cost
Leverage	(0.0, 2.0, 1.0)	+1.0	(0 + +)	Amplifies gain but still carries some cost — classic power multiplier
Liquidity	(0.0, 2.0, -1.0)	+3.0	(0 + -)	Pure upside flow — high benefit, low/negative cost (easy exit/movement)
Insolvent	(-2.0, -2.0, 2.0)	-6.0	(- - +)	Total collapse — legitimacy & benefit destroyed, massive cost explosion
Equity	(1.0, 1.0, 0.0)	+2.0	(+ + 0)	Fair share / ownership — balanced legitimacy & benefit, neutral cost
Indemnity	(0.0, 1.0, -2.0)	+3.0	(0 + -)	Protection from loss — benefit preserved, costs heavily shielded
Default	(-2.0, -1.0, -1.0)	-4.0	(- - -)	Failure cascade — legitimacy, benefit, and cost all go negative (systemic poison)
Protocol	(-1.0, 0.0, -1.0)	-2.0	(- 0 -)	Rigid rule-set — reduces agency & cost avoidance, neutral benefit
Redacted	(-1.0, 0.0, -1.0)	-2.0	(- 0 -)	Hidden / erased — legitimacy obscured, cost dodged but no gain
Coercion	(-1.5, 1.5, 1.5)	-1.5	(- + +)	Forced gain — high benefit but legitimacy hit + enforcement cost

Blackmail	(-2.0, 2.0, 1.0)	-1.0	(- + +)	Extractive leverage — massive upside for wielder, but legitimacy crater + cost risk
Whistleblower	(1.5, -1.0, 2.0)	-1.5	(+ - +)	Moral high ground — legitimacy boost, but personal loss & high exposure cost
Narrative	(0.5, 1.0, -0.5)	+2.0	(+ + -)	Story control — shapes legitimacy & benefit while minimizing cost
Gaslight	(-1.0, 0.5, -0.5)	+0.0	(- + -)	Reality distortion — subtle legitimacy erosion for attacker, small gain, low cost
Virtue Signal	(1.0, -0.5, 0.5)	+0.5	(+ - +)	Cheap legitimacy play — moral posturing with minor cost & negative real benefit
Rug Pull	(-1.5, 2.5, 0.5)	+0.5	(- + +)	Crypto betrayal — huge short-term gain, legitimacy destroyed, moderate cost to puller
FOMO	(0.0, 1.5, 0.5)	+1.0	(0 + +)	Urgency trap — drives benefit-seeking behavior, but adds cost pressure
Cancel	(-2.0, -1.5, 1.0)	-4.5	(- - +)	Social execution — obliterates legitimacy & benefit, costs imposed on target

New Multilingual Vector Words (added to the full table style)

Word (Language)	English Equivalent	Vector (L, B, C)	Typical V (w=1,1,1)	Signature	Intuitive System Meaning (cross-cultural)
Souveraineté (French)	Sovereignty	(1.0, 1.0, -1.0)	+3.0	(+ + -)	Supreme legitimate authority — classic Bodin-style win with shielded cost
Souveraineté nationale (French)	National Sovereignty	(1.2, 0.8, -0.8)	+2.8	(+ + -)	Nation embodied as sovereign — post-revolutionary

Souveränität (German)	Sovereignty	(1.0, 1.0, -1.0)	+3.0	(+ + -)	Staatsgewalt / supreme state power — strong legal-constitutional emphasis
Soberanía (Spanish)	Sovereignty	(1.0, 1.0, -1.0)	+3.0	(+ + -)	Independence from external control — key in Latin American independence eras
سيادة (Siyada) (Arabic)	Sovereignty	(1.0, 1.0, -1.2)	+2.8	(+ + -)	Supreme authority / independence — often tied to religious/Ummah legitimacy
主權 (Shuken) (Japanese)	Sovereignty	(0.8, 1.2, -0.8)	+2.8	(+ + -)	National independence / supreme rights — post-WWII constitutional focus
免責 (Men-seki) (Japanese)	Exempt / Indemnity	(1.0, 1.0, -2.0)	+4.0	(+ + -)	Exemption from responsibility — strong in contracts & corporate shielding
Indemnité (French)	Indemnity	(0.0, 1.0, -2.0)	+3.0	(0 + -)	Protection against loss — common in French legal & insurance contexts
Indemnización (Spanish)	Indemnity	(0.0, 1.0, -2.0)	+3.0	(0 + -)	Compensation / hold harmless — key in civil law systems
责任 (Zérèn) (Chinese)	Liability	(-1.0, -1.0, 1.0)	-3.0	(- - +)	Burden of responsibility — heavy in regulatory & social credit systems
Responsabilidad (Spanish)	Liability	(-1.0, -1.0, 1.0)	-3.0	(- - +)	Accountability / fault — central in tort & contract law
Haftung (German)	Liability	(-1.0, -1.0, 1.2)	-3.2	(- - +)	Legal responsibility — strict in German civil & commercial code

Consentement (French)	Consent	(1.0, 1.0, 0.0)	+2.0	(+ + 0)	Mutual agreement — foundational in French contract & medical law
Consentimiento (Spanish)	Consent	(1.0, 1.0, 0.0)	+2.0	(+ + 0)	Voluntary agreement — key in human rights & data protection contexts
同意 (Dōi) (Japanese)	Consent	(1.0, 1.0, 0.0)	+2.0	(+ + 0)	Agreement / approval — increasingly important in privacy & corporate settings
Mandat (French)	Mandate	(1.0, 0.0, 1.0)	+1.0	(+ 0 +)	Authority / commission — political or legal delegation
Mandato (Spanish)	Mandate	(1.0, 0.0, 1.0)	+1.0	(+ 0 +)	Order / representation — common in electoral & agency law
授权 (Shòuquán) (Chinese)	Mandate / Authorization	(1.0, 0.0, 1.0)	+1.0	(+ 0 +)	Delegated power — frequent in governance & business hierarchies
Sanction (French)	Sanction	(-2.0, -1.0, 1.0)	-4.0	(- - +)	Penalty / coercive measure — used in law & international relations
Sanción (Spanish)	Sanction	(-2.0, -1.0, 1.0)	-4.0	(- - +)	Punishment / fine — strong in administrative & penal contexts
عقوبة (Uquba) (Arabic)	Sanction / Penalty	(-2.0, -1.0, 1.5)	-4.5	(- - +)	Punishment / retribution — often moral/legal/religious overlay

Word	Vector (L, B, C)	Typical V (w=1,1,1)	Signature	Intuitive System Meaning
Hegemony	(1.5, 2.0, -1.5)	+5.0	(+ + -)	Dominance over systems — high legitimacy & benefit, costs externalized to subordinates

Panopticon	(-1.5, 1.0, -0.5)	+0.0	(- + -)	Surveillance trap — erodes agency for controller's gain, low direct cost
Existential Risk	(-2.5, -2.0, 3.0)	-7.5	(- - +)	Ultimate threat — legitimacy & benefit obliterated, catastrophic cost cascade
Singularity	(0.0, 3.0, 2.0)	+1.0	(0 + +)	Tech transcendence point — massive potential gain, but high uncertainty cost
Cybernetic	(0.5, 1.5, 0.5)	+1.5	(+ + +)	Feedback control loop — subtle legitimacy build with benefit, moderate enforcement cost
Dialectic	(0.0, 1.0, 1.0)	+0.0	(0 + +)	Thesis-antithesis-synthesis — neutral L, gain through conflict, inherent cost
Realpolitik	(-0.5, 2.5, 1.0)	+1.0	(- + +)	Pragmatic power play — benefit prioritized over legitimacy, with calculated cost
Necropolitics	(-2.0, 1.5, 2.0)	-2.5	(- + +)	Sovereignty over death — gain through letting die, high legitimacy erosion & cost
Hyperstition	(0.5, 2.0, -1.0)	+3.5	(+ + -)	Self-fulfilling prophecy — narrative that becomes real, high B with cost avoidance
Accelerationism	(-1.0, 3.0, 2.5)	-0.5	(- + +)	Push systems to collapse for rebirth — huge potential gain, but legitimacy hit & cost
